1. This is a first Office action on the merits for application serial number 10/054929 filed 01/25/02. Claims 1-4 are pending.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is an inadequate written description of the hinging of the extending rod and strutting rib. The hinge is not clearly shown or described.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claim 1 fails to particularly point out and distinctly claim the invention as understood. Lines 5 and 6 of the claim recite "the other end thereof is pivotally connected to the middle portion of the strutting rib". One end of the umbrella

Art Unit: 3635

post is recited, so it would follow the "the other end thereof" is referring to the umbrella post. As understood the middle portion of the strutting rib is not pivotally connected to the umbrella post at all.

Also in claim 1, "the canopy", "the jointing area" and "the joint end" lack antecedent basis.

Claim 3 is not written in proper idiomatic English and as a result the scope is unclear.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by U.S Patent 1,919,610 to Wery.

Wery provides upper nest 28, lower nest 39, post 15, inner rib 25, strutting rib 27, and outer rib 26. An inner end of strutting rib 27 has an extending rod 41 which extends through a radial slot and into an inner hole of the lower nest 39 as best shown in figure 3.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3635
